

The measures determined by the Ministry of Health of the Republic of Turkey for travel to Turkey from abroad by air, land and railway.

Measures for air travel:

- Civil airline companies will continue to implement protection and control measures for flights which were introduced previously against the COVID-19 pandemic.
- The “Circular on Airport Pandemic Measures and Certification” issued by the Directorate General of Civil Aviation shall apply.
- Passengers and other persons who come to airports will get services in line with measures determined for COVID-19.
- During the flight, passengers will be asked to complete the passenger information form (personal information, seat number, the address they will be staying at in Turkey, contact information, symptom information) and will be given an information note on COVID-19.
- These forms will be saved for a month and will be handed to the relevant Provincial Health Directorate if they require them.
- When the aircraft lands at the airport, it will be required to submit a GENDEC on whether anyone on the aircraft is showing symptoms.
- If the aircraft is carrying a passenger who is suspected of having COVID-19, on-board procedures shall be implemented.
- After the passengers leave the aircraft and are transported to the terminal in compliance with social distancing measures, their temperatures will be measured and those who are found to have a fever will be questioned over possible symptoms.
- If a passenger who is suspected of having COVID-19 is identified at the airport, he/she will be quarantined/isolated. The contact person of the Health Directorate and the 112 emergency services will be notified of the status of the passenger and the sick passenger will be transported to hospital for an examination.
- If the patient is diagnosed with COVID-19, the passenger information forms will be used to identify persons who have come into contact with him/her (all seats within a two-metre radius of the seat of the COVID-19 patient: the two rows in the front, the two rows in the back and the two seats to the side, and if the patient in question was sitting in an aisle seat, the persons sitting in the seats diagonally behind and in front). Their ID information, contact details and address will be passed on to the relevant Directorate of Health as soon as possible.
- If authorities are informed of passengers who develop COVID-19 in the period after the flight, the passenger information forms will be used to identify persons who have come into contact with them on the plane.
- Persons identified as having come into contact with a COVID-19 case on the aircraft will be quarantined/isolated for 14 days and will be processed in accordance with the quarantine/isolation procedures in force.

- If authorities find no problems with respect to COVID-19, people will be able to leave the airport in line with the rules in place.

Measures for land travel:

- If the passengers will cross in mass transport vehicles (such as buses, trains, etc.), they will be asked to fill out passenger information forms.
- Before passport procedures at border crossings, each passenger will have his/her temperature measured and hand in his/her passenger information form. Authorized personnel will check each passenger information form. If there are any passengers who are reporting a symptom, they will be quarantined/isolated. The 112 emergency services will be notified of the status of the passenger and the sick passenger will be transported to hospital for an examination.
- The passenger information form will contain the passenger's personal information, seat number, the address he/she will be staying at in Turkey, contact information and symptom information. For railway passengers, the form must also contain the carriage number.
- These forms will be saved for a month by the land border teams of the Provincial Health Directorate with record of the travel company's bus/train number, the country it has come from and the license plate of the vehicle.
- If authorities find no problems with respect to COVID-19, passengers will be distributed an information note on COVID-19 and be allowed to leave.
- If a passenger tests positive for COVID-19, the people he/she came into contact with inside the vehicle and elsewhere will be identified (in accordance with the sections on tracing people who have come into contact with COVID-19 patients, outbreak management, monitoring patients at home and contact tracing of the COVID-19 guide) and the health directorates of the provinces they will travel to will be notified as soon as possible.
- Persons identified as having come into contact with a COVID-19 case will be quarantined/isolated for 14 days and will be processed in accordance with the quarantine/isolation procedures in force. They will be warned against straying from the route the vehicle will take.
- Utmost care will be taken to ensure that staff wear protective equipment while checking vehicles and people, that passengers observe social distancing rules and wear masks. It will not be possible to enter terminal buildings without a mask.
- Passengers who arrive in their private vehicles will be given information notes on COVID-19.

Measures for sea travel:

- For sea voyages, passengers will be asked at ports to complete the passenger information form (personal information, the address they will be staying at in Turkey,

contact details, symptom information) and will be given an information note on COVID-19.

- These forms will be saved for a month and will be handed to the relevant Provincial Health Directorate if they require them.
- Those who arrive by yacht will be asked to complete the passenger information form (personal information, the address they will be staying at in Turkey, contact details, symptom information) during the security check where they dock. The passengers will be given an information note on COVID-19.
- These forms will be saved for a month and will be handed to the relevant Provincial Health Directorate if they require them.
- Passengers and other persons who come to ports will get services in line with measures determined for COVID-19.
- The captain will be asked to provide a declaration on whether anyone on the vessel is showing symptoms of the disease.
- If there is a passenger who is suspected of having COVID-19, the vessel's own procedures for such an eventuality will be implemented.
- If a passenger who is suspected of having COVID-19 is identified at port, he/she will be quarantined/isolated. The contact person of the Health Directorate and the 112 emergency services will be notified of the status of the passenger and the sick passenger will be transported to hospital for an examination.
- If the patient is diagnosed with COVID-19, the passenger information forms will be used to identify persons who have come into contact with him/her. Their ID information, contact details and address will be passed on to the relevant province's Directorate of Health as soon as possible.
- If authorities are informed of passengers who develop COVID-19 in the period after the voyage, the passenger information forms will be used to identify persons who have come into contact with them.
- Persons identified as having come into contact with a COVID-19 case will be quarantined/isolated for 14 days and will be processed in accordance with the quarantine/isolation procedures in force.
- If authorities find no problems with respect to COVID-19, people will be able to leave the port in line with the rules in place.
